WHAT IS A BUNION?

Bunions are a *big toe joint* problem, not a growth of bone.

Bunionplasty® | **360 BUNION REPAIR™**

Patented¹ technology to realign & regenerate the bone.

The minimally invasive Bunionplasty® procedure utilizes a specialized implant to secure the realigned bone as it heals naturally.

WHAT CAN I EXPECT?

What *patients* are saying about the procedure.

★★★★★

"It didn't take long and I was out walking on it the same day – no pain."

NICOLE

★★★★★

"Within 8 weeks, I was back on the Jiu Jitsu mat. My balance has greatly improved."

JOSEPH

★★★★★

"The healing process was remarkably fast. Beyond thrilled with the results!"
